React Best Practices

SWIPE

@nishasingla05

Save it

If component doesn't have children's props, use the self-closing tag

```
return <App></App> ;
```

```
return <App />;
```

@nishasingla05

SWIPE

Use Ternary operator instead of if-else

```
if(isLoading){
  return <p>loading..</p>;
} else {
  return <Data />;
}
```

```
return isLoading ? <p>loading...</p> : <Data />;
```

@nishasingla05

SWIPE

Don't use else block if 'if' block returns something

```
if(status){
  return <User />;
} else {
  return <Login />;
}
```

```
if(status){
  return <User />;
}
  return <Login />;
```

FEW MORE TIPS

- use Typescript: its not required but it will help you to write better code
- use eslint, prettier for formatting
- use vscode extension for better development
  - auto close tag
  - auto rename tag
  - CSS Peek
  - GitLens
  - Prettier
  - React/Redux/React-native snippets
