Input:

Use [Faker](#) to generate fake data of 100,000 users (ID, Username, Address, Age, Phone Number, Occupation, Vehicle information, etc).

Create:

1. Bar chart according to which country users belong.
2. Pie chart for their car models on the basis of their Car Maker
3. Pie chart for their car's age.
4. Create a filter option for the car's models and car's age chart according to user age range (eg. 20 - 25, 25 - 30, and so on).
5. Virtualized list of users with their User Name and Age in the left sidebar which will be unpaginated. (Use [react-virtualized](#)) - onClick open a sidebar with full information of the user.
6. A paginated list of cars without duplicates - onClick open a sidebar with a list of users using that car.

Do not use:

- Any CSS Library.
